## THE SIGNIFICANCE OF THE BOSNIAN PYRAMID DISCOVERY

In April 2005 I first traveled to the town of Visoko, 20 miles northwest from Sarajevo, the capital of Bosnia-Herzegovina. My attention was caught by two regularly shaped hills, which I later named the Bosnian Pyramids of the Sun and Moon. For thousands of years locals have considered those hills natural phenomenon because they were covered by soil and vegetation. However, when I first saw their triangular faces, obvious corners and orientation toward the cardinal points, I knew that they had to be constructed by a force other than nature. Since I have been investigating pyramids for decades I knew that pyramids in China, Mexico, Guatemala and El Salvador have had the same type of soil and vegetation coverage.

In 2005 I started working on this project and paid construction companies and geologists to do core drilling and geo-morphological analysis. I then announced to the world, in a press conference, that the first pyramids in Europe had been discovered.

Shortly thereafter I established the non-profit **Archaeological Park: Bosnian Pyramid of the Sun Foundation** and since that time the pyramid investigations in Bosnia have become the world's largest inter-disciplinary archaeological project. We have spent over 340.000 hours in archaeological excavation, sample testing and radiocarbon dating in the period of 2005 to 2011. We have determined that Bosnian Valley of the Pyramids consists five pyramids discovered to date which I have named: The Bosnian Pyramids of the Sun, Moon, Dragon, Mother Earth and Love. The site also includes a tumulus complex and a huge underground labyrinth.

This discovery is history-changing for several reasons:

1. These are the first pyramids discovered in Europe

2. The site includes the biggest pyramidal structure in the world—The Bosnian Pyramid of the Sun with its height of over 220 meters is much higher than the Great Pyramid of the Egypt (147 meters).
3. The Bosnian Pyramid of the Sun has the most precise orientation towards the cosmic north of any pyramid.
4. The Bosnian Pyramid of the Sun is completely covered by rectangular concrete blocks. Properties of the concrete, such as extreme hardness and low water absorption, are, according to the scientific institutions in Bosnia, Italy and France, much superior to the modern concrete materials.
5. The pyramids are covered by soil which is, according to the state Institute for Agro-pedology, over 12,000 years old. This finding confirms the Bosnian pyramids are the oldest pyramids on the planet.
6. Below the Bosnian Valley of the Pyramids is the most-extensive underground tunnel and chamber network which runs for more than ten miles.
7. Ceramic sculptures have been discovered in underground labyrinth with a mass of up to 20.000 pounds which makes them the largest so far found from the ancient world.

The list of the miracles in Bosnian archaeology does not end here. In the vicinity, we discovered the tallest tumulus in the World – 61 meter high. On the other side, Sillbury Hill in England is 60 meters high. The Bosnian tumulus consists of two-layer megalithic terraces, clay layers and artificial concrete layers.

A team of physicists detected an energy beam coming through the top of the Bosnian Pyramid of the Sun. The radius of the beam is 4.5 meters with a frequency of 28 kHz. The beam is continuous and its strength grows as it moves up and away from the top of the pyramid. This phenomenon contradicts our known physical laws and technology. This is the first proof of non-herzian technology on the Planet. It seems that the pyramid-builders created the perpetual mobile a long time ago and this “energy machine” is still working.

In the underground labyrinth we discovered three chambers in 2010 and small blue lake. Energy screening shows that the ionization level is 43 times higher than the average concentration outside which makes the underground chambers healing rooms.

Further electromagnetic detection in 2011 confirmed that levels of negative radiation through the Hartman, Curry and Schneider grids are equal to zero in the tunnels. There was no technical radiation (from power lines and/or technology) found in the tunnels and no cosmic radioactivity. The ceramic sculptures are positioned over the underground water flows and the negative energy is transformed to positive. All of these experiments point to the underground labyrinth as one of the most secure underground constructions in the world and this makes it an ideal place for body rejuvenation and regeneration.

Two hundred years of Egyptology has not produced a satisfactory answer to the question of what the real purpose was for building the pyramids.

In only six years, our research in Bosnia has applied inter-disciplinary scientific methods, and looked at this complex through the physical, energetic and spiritual dimensions. We have had pioneering results which affects the science of pyramids. Our history is changing with each new discovery.

Perhaps by changing our beginnings we can change our present and our future for the better.

Bosnian Pyramid of the Sun, Visoko, Bosnia-Herzegovina

Bosnian Valley of the Pyramids have been visited by 500,000 tourists in a period 2005 to 2011

International Summer Camp for Volunteers attracts 500 volunteers from 6 continents every year; photograph shows excavated paved terrace on Bosnian Pyramid of the Moon

Ceramic sculpture "K-2" in underground labyrinth weigh 18,000 lbs
