

Publications of Emilio Santos

TECHNICAL ARTICLES

1. "Formation energy of vacancies in graphite crystals", *Proc. Roy. Soc.* **274 A**, 461–479 (1963). (In collaboration with C. A. Coulson, S. Senent, M. A. Herráez & M. Leal.)
2. "Deformation of graphite lattices by interstitial carbon atoms", *Carbon* **3**, 445–457 (1966). (Col. C. A. Coulson, S. Senent, M. A. Herraez & M. Leal.)
3. "An estimation of the correlation energy between two paired electrons", *Nuovo Cimento* **45**, 87–91 (1966). (Col. M. Leal.)
4. "Correlated self-consistent field function for two paired electrons", *Nuovo Cimento* **51B**, 213–216 (1967).
5. "Deformation of graphite lattices by interstitial C₂ molecules", *Carbon* **6**, 267–271 (1968). (Col. M. Leal.)
6. "Cálculo aproximado de la energía de correlación entre dos electrones (Approximate calculation of the correlation energy between two electrons)", *An. Fis.* **64**, 177–193 (1968).
7. "Is there an electromagnetic background radiation underlying the quantum phenomena?", *An. Fis.* **64**, 317–320 (1968).
8. "Solución de las ecuaciones de Einstein–Maxwell para una corriente eléctrica cilíndrica estacionaria (Solution of the Einstein–Maxwell equations for a stationary cylindrical electric current)", *An. Fis.* **64**, 283–285 (1968).
9. "A Lagrangian formulation of the theory of random motion", *Nuovo Cimento* **59B**, 65–81 (1969).
10. "Mathematical foundations of the classical mechanics of systems with infinitely many degrees of freedom", *Rev. Mat. Hispano-Americana* **29**, 133–147 (1969).
11. "Corrections for inhomogeneity in the Thomas-Fermi theory of nuclei", *Lett. Nuovo Cimento* **3**, 469–472 (1970).

12. "On the derivation of the Schrodinger equation from Newtonian mechanics", *Phys. Lett.* **38A**, 501–502 (1972). (Col. J. A. Alonso & M. Paz Nieto.)
13. "Classical interpretation of the uncertainty relations and the old quantum theory", *Lett. Nuovo Cimento* **4**, 497–501 (1972).
14. "Cálculo de la dilatación producida por vacantes simples en un cristal de grafito" (Calculation of the expansion of graphite crystals by simple vacancies), *An. Fis.* **68**, 129–163 (1972). (Col. F. Enríquez.)
15. "Thomas-Fermi calculation of the interlayer force in graphite", *Phys. Rev. B* **6**, 3134–3141 (1972). (Col. A. Villagrà.)
16. "Límite clásico de la Mecánica Cuántica formulada mediante integración sobre caminos (Classical limit of quantum mechanics in the path integral formulation)", *An. Fis.* **69**, 287–290 (1973). (Col. M. Paz Nieto.)
17. "The harmonic oscillator in stochastic electrodynamics", *Nuovo Cimento* **19B**, 57–89 (1974).
18. "Foundations of stochastic electrodynamics", *Nuovo Cimento* **22B**, 201–214 (1974).
19. "Quantum-like formulation of stochastic problems", *J. Math. Phys.* **15**, 1954–1962 (1974).
20. "Improved first order perturbative calculation of the ground state energy of atoms", *J. Chem. Phys.* **61**, 2471 (1974). (Col. M. Leal.)
21. "Método de Hartree-Fock utilizando matrices densidad en representación de coordenadas (Hartree-Fock using density matrices in the coordinate representation)", *An. Fis.* **70**, 253–256 (1974). (Col. M. G. A. Quintas.)
22. "Calculation of the expansion in a graphite crystal by C_n interstitials", *Carbon* **13**, 225–231 (1975). (Col. F. Enríquez & M. A. G. Quintas.)
23. "Probabilistic approach to teaching the principles of quantum mechanics", *Am. J. Phys.* **44**, 278–283 (1976).
24. "Semi statistical model for metals", *J. Phys. Chem. Solids* **38**, 307–310 (1977). (Col. J. A. Alonso.)
25. "Path integrals in stochastic electrodynamics", *Lett. Nuovo Cimento* **20**, 308–312 (1977), **25**, 287–288 (1979). (Col. L. Pesquera.)
26. "Coupled harmonic oscillators in stochastic electrodynamics", *Lett. Nuovo Cimento* **25**, 360–364 (1979). (Col. R. Blanco.)
27. "Einstein and the conceptual problems of quantum mechanics", *An. Fis.* **75**, 165–171 (1979).
28. "Classical relativistic statistical mechanics: The case of a hot dilute plasma", *Phys. Rev. D* **23**, 2181 (1981). (Col. R. Lapiedra.)

29. "A generalized Weyl correspondence: Applications", *J. Math. Phys.* **22**, 1651–1659 (1981). (Col. M. Gadella.)
30. "Possibilities of an objective interpretation of quantum mechanics", *An. Fis. A* **78**, 1–6 (1982).
31. "Calculation of binding between layers in graphite by the Thomas–Fermi–Kirzhnits method", *Nuovo Cimento* **1D**, 716–724 (1982). (Col. M. Leal.)
32. "Classical dilute relativistic plasma in equilibrium. Two-particle distribution function", *Phys. Rev. A* **27**, 422–430 (1983). (Col. R. Lapedra.)
33. "Path integrals for non-Markovian processes", *Phys. Lett.* **94 A**, 287–289 (1983). (Col. L. Pesquera & M. A. Rodriguez.)
34. "Equilibrium between radiation and matter for classical relativistic multiperiodic systems. Derivation of Maxwell-Boltzmann distribution from Rayleigh-Jeans spectrum", *Phys. Rev. D* **27**, 1254–1287 (1983). (Col. R. Blanco & L. Pesquera.)
35. "Thermal properties of nuclei in the energy density formalism", *Nuovo Cimento* **78A**, 135–146 (1983). (Col. S. Marcos.)
36. "Equilibrium between radiation and matter for classical relativistic multiperiodic systems. II. Study of radiative equilibrium with Rayleigh-Jeans radiation", *Phys. Rev. D* **29**, 2240–2254 (1983). (Col. R. Blanco & L. Pesquera.)
37. "Local realism has not been refuted by atomic cascade experiments", *Phys. Lett.* **98A**, 5–9 (1983). (Col. T. W. Marshall & F. Selleri.)
38. "Collective effects in the atomic-cascade experimental test of Bell inequalities", *Lett. Nuovo Cimento* **38**, 417–420 (1983). (Col. T. W. Marshall & F. Selleri.)
39. "Equation for the potential of an electron system with slowly varying density in the energy-functional formalism", *Phys. Rev. A* **28**, 459–461 (1983). (Col. M. Leal.)
40. "Microscopic and macroscopic Bell inequalities", *Phys. Lett.* **101A**, 379–382 (1984).
41. "Comment on proposed molecular test of local hidden-variables theories", *Phys. Rev. A* **30**, 2128–2129 (1984).
42. "Local realist model for the coincidence rates in atomic-cascade experiments", *Phys. Lett.* **107A**, 264–168 (1985). (Col. T. W. Marshall.)
43. "Local realist photon model compatible with Malus's law for experiments testing Bell's inequalities", *Phys. Lett.* **108A**, 373–376 (1985). (Col. M. Ferrero.)
44. "Study of interplanar binding in graphite by extended Thomas–Fermi theory", *Phys. Rev. B* **31**, 8226–8231 (1985). (Col. E. Gaité & M. Leal.)

45. "A Bell inequality involving position, momentum and energy", *Phys. Lett.* **113A**, 304–306 (1985). (Col. A. M. Cetto & L. de la Peña.)
46. "The Bell inequalities as tests of classical logic", *Phys. Lett. A* **115**, 363–365 (1986).
47. "Local hidden-variable theories cannot be tested by atomic cascade experiments", *Phys. Lett. A* **116**, 356–360 (1986). (Col. M. Ferrero.)
48. "Dirac's large-number hypothesis revised", *Astron. Astrophys.* **164**, 1–5 (1986). (Col. A. Cetto & L. de la Peña.)
49. "The energy of an inhomogeneous electron gas as a functional of the electric potential", *Europhys. Lett.* **3**, 169–174 (1987). (Col. A. Mañanes.)
50. "Interplanar binding in graphite studied with the Englert–Schwinger equation", *Phys. Rev. B* **34**, 5874–5882 (1986). (Col. A. Mañanes.)
51. Comment on "Experimental evidence for a photon anticorrelation effect on a beam splitter: A new light on single-photon interferences", *Europhys. Lett.* **3**, 293–296 (1987). (Col. T. W. Marshall.)
52. "Proposed atomic cascade experimental test of symmetric local hidden variables theories", *Phys. Rev. D.* **36**, 636–639 (1987).
53. "The anharmonic oscillator at a finite temperature. Comparison of quantum and classical stochastic calculations", *J. Math. Phys.* **28**, 1749–1758 (1987). (Col. R. Blanco & L. Pesquera.)
54. "The generalized Weyl correspondence and time dependent stochastic processes", *J. Math. Phys.* **28**, 2961–2972 (1987). (Col. M. Gadella, L. M. Nieto & J. M. Noriega.)
55. "Stochastic optics: A reaffirmation of the wave nature of light", *Found. Phys.* **18**, 185–223 (1988). (Col. T. W. Marshall.)
56. "El teorema de Bell: Realismo local frente a mecánica cuántica" (Bell's theorem: Local realism vs. quantum mechanics). *Rev. Española de Física* **2**, 38–43 (1988).
57. "Stochastic optics: A local realistic analysis of optical tests of Bell inequalities", *Phys. Rev. A* **39**, 6271–6283 (1989). (Col. T. W. Marshall.)
58. "Relevance of detection efficiency in the optical tests of Bell inequalities", *Phys. Lett. A* **139**, 431–436 (1989).
59. "Application of extended Thomas–Fermi theory to the binding of graphite", *Il Nuovo Cimento* **12 D**, 749–755 (1990). (Col. A. Mañanes.)
60. "Langevin equation for the squeezing of light by means of a parametric oscillator", *Phys. Rev. A* **41**, 1582–1586 (1990). (Col. T. W. Marshall.)
61. "Constructive approach to logics of physical systems: Application to EPR case", *Int. J. Theor. Phys.* **29**, 1041–1058 (1990). (Col. J. Pykacz.)

62. "What is wrong with these elements of reality", *Phys. Today* November 1990.
63. "Bell's theorem: Local realism versus quantum mechanics", *Am. J. Phys.* **58**, 683–688 (1990). (Col. M. Ferrero & T. Marshall.)
64. "Classical interpretation of the Debye law for the specific heat of solids", *Phys. Rev. A* **43**, 693–699 (1991) (Col. R. Blanco & H. M. França.)
65. "Hidden variables in quantum logic approach reexamined", *J. Math. Phys.*, **32**, 1287–1292 (1991). (Col. J. Pykacz.)
66. "Interpretation of the quantum formalism and Bell's theorem", *Found. Phys.* **21**, 221–241 (1991).
67. Comment on "Source of vacuum electromagnetic zero-point energy", *Phys. Rev. A* **44**, 3383–3384 (1991).
68. "Photoelectron counting theory in terms of the Wigner and Q representations of the light field", *J. Mod. Optic.* **38**, 1463–1470 (1991). (Col. T. W. Marshall.)
69. "Does quantum mechanics violate the Bell inequalities?", *Phys. Rev. Lett.* **66**, 1388–1390, 3227 (1991).
70. Comment on "Nonlocality of a single photon", *Phys. Rev. Lett.* **68**, 894 (1992).
71. Reply to comment on "Does quantum mechanics violate the Bell inequalities?", *Phys. Rev. Lett.* **68**, 2702–2703 (1992).
72. "Spontaneous emission in confined space", *Phys. Rev. A* **45**, 6436–6442 (1992). (Col. H. M. França & T. W. Marshall.)
73. "The physical meaning of quantization", *Found. Phys.* **22**, 371–379 (1992).
74. "Possible interference effect in the Stern-Gerlach phenomenon", *Phys. Rev. A* **46**, 2265–2270 (1992). (Col. H. M. França, T. W. Marshall & E. J. Watson.)
75. "Critical analysis of the empirical tests of local hidden-variables theories", *Phys. Rev. A* **46**, 3646–3656 (1992).
76. "Interpretation of quantum optics based upon positive Wigner functions", *Found. Phys. Lett.* **5**, 573–578 (1992). (Col. T. W. Marshall.)
77. "Problem of hidden variables", *Int. J. Theor. Phys.* **31**, 1909–1913 (1992).
78. "Spectrum of the electromagnetic radiation stationary in a static gravitational field", *Gen. Relat. Grav.* **25**, 717–720 (1993).
79. "A phase-space description of the Stern–Gerlach phenomenon", *Phys. Lett. A* **183**, 19–23 (1993). (Col. J. M. Gracia-Bondía & T. W. Marshall.)
80. "Objectification of classical properties induced by quantum vacuum fluctuations", *Phys. Lett. A* **188**, 198–204 (1994).

81. "Atomic-cascade experiment with detection of the recoil atom", *Europhys. Lett.* **27**, 181–186 (1994). (Col. S. F. Huelga & M. Ferrero.)
82. Reply to "Objectification of classical properties induced by quantum vacuum fluctuations", *Phys. Lett. A* **197**, 185,186 (1995).
83. "Loophole-free test of the Bell inequality", *Phys. Rev. A* **51**, 5008–5011 (1995) (Col. S. F. Huelga & M. Ferrero.)
84. "Proposed test for realist theories using Rydberg atoms coupled to a high-Q resonator", *Phys. Rev. A* **52**, R2497–2500 (1995). (Col. S. F. Huelga & T. W. Marshall.)
85. "Constraints for the violation of the Bell inequality in Einstein–Podolsky–Rosen–Bohm experiments", *Phys. Lett. A* **200**, 1–6 (1995).
86. "Semiclassical treatment of macroscopic quantum relaxation", *An. Fis. (Madrid)* **91**, 49–53 (1995). (Col. T. W. Marshall.)
87. Comment on "Experimental demonstration of the violation of local realism without Bell inequalities", *Phys. Lett. A* **214**, 316–318 (1996). (Col. A. Cabello.)
88. "Temporal Bell-type inequalities for two-level Rydberg atoms coupled to a high-Q resonator", *Phys. Rev. A* **54**, 1798–1807 (1996). (Col. S. F. Huelga & T. W. Marshall.)
89. "Unreliability of performed tests of Bell's inequality using parametric down-converted photons", *Phys. Lett. A* **212**, 10–14 (1996).
90. "Observation of quantum coherence by means of temporal Bell-type inequalities", *Europhys. Lett.* **38**, 249–254 (1997) (Col. S. F. Huelga & T. W. Marshall.)
91. "Effect of perturbing the internal structure in atom interference: The relevance of photon dressing", *Phys. Lett. A* **228**, 232–238 (1997).
92. "Wigner density of a rigid rotator", *Phys. Rev. E* **55**, 2551–2556 (1997) (Col. C. P. Malta & T. W. Marshall.)
93. "Parametric downconversion experiments in the Wigner representation", *J. Opt. Soc. Amer. B* **14**, 494–502 (1997) (Col. A. Casado & T. W. Marshall.)
94. "Fourth order interference in the Wigner representation for parametric downconversion experiments", *Phys. Rev. A* **55**, 3879–3890 (1997). (Col. A. Casado, A. Fernández-Rueda, T. W. Marshall & R. Risco-Delegado.)
95. "Dispersion cancellation and quantum eraser experiments analyzed in the Wigner function formalism", *Phys. Rev. A* **56**, 2477–2480 (1997). (Col. A. Casado, A. Fernández-Rueda, T. W. Marshall & R. Risco-Delegado.)
96. "Empirical consequences of the scientific construction: The program of local hidden variables in quantum mechanics", *Found. Phys.* **27**, 765–800 (1997). (Col. M. Ferrero.)

97. "Radiative corrections in the Zeeman effect of 2^3P states of helium", *Phys. Rev. A* **56**, 3576–3582 (1997). (Col. I. Gonzalo.)
98. "Casimir interaction between a microscopic dipole oscillator and a macroscopic solenoid", *Phys. Rev. A* **57**, 724–730 (1998). (Col. R. Blanco, K. Dechoum & H. M. França.)
99. "Entanglement, information theory and Bell's inequality", *Phys. Lett. A* **238**, 85–89 (1998). (Col. A. Mann & M. Revzen.)
100. "Type II parametric downconversion in the Wigner formalism. Entanglement and Bell's inequalities", *J. Opt. Soc. Am. B* **15**, 1572–1577 (1998). (Col. A. Casado & T. W. Marshall.)
101. "Equilibrium of spheres with local anisotropy in post-Newtonian gravity. Application to supermassive stars", *Class. Quant. Grav.* **15**, 3645–3654 (1998).
102. "White dwarfs with anisotropic pressure in post-Newtonian gravity", *Astrophys. Space Sci.* **259**, 31–43 (1998).
103. "Microscopic theory of the Aharonov-Bohm effect", *Europhys. Lett.* **45**, 418–423 (1999). (Col. I. Gonzalo.)
104. "Perturbation of the evolution of a quantum system induced by its environment", *Phys. Lett. A* **259**, 83–90 (1999). (Col. L. de la Peña.)
105. "Irrelevance of photon events distinguishability in a class of Bell experiments", *Phys. Rev. A* **60**, R2614–2617 (1999). (Col. M. Zukowski & D. Kaszlikowski.)
106. "Parametric down and up conversion in the Wigner representation of quantum optics", *J. Mod. Optic.* **47**, 1273–1287 (1999). (Col. K. Dechoum & T. W. Marshall.)
107. "The problem of light detection in the presence of zeropoint fluctuations: A physical model for the vision of weak signals", *Found. Phys. Lett.* **13**, 253–264 (2000). (Col. K. Dechoum & L. de la Peña.)
108. "Dependence on crystal parameters of the correlation time between signal and idler beams in parametric down conversion calculated in the Wigner representation", *Eur. Phys. J. D* **11**, 465–472 (2000). (Col. A. Casado, A. Fernández-Rueda, T. W. Marshall, J. Martínez & R. Risco-Delgado.)
109. "Linear entropy and Bell inequalities", *Phys. Rev. A* **62**, 024101–2 (2000). (Col. M. Ferrero.)
110. "Spectrum of the parametric down converted radiation calculated in the Wigner function formalism", *Eur. Phys. J. D* **13**, 109–119 (2001). (Col. A. Casado, T. W. Marshall & R. Risco-Delgado.)
111. "Quantum approach to neutron stars leading to configurations with local anisotropy and mass above the Oppenheimer-Volkoff limit", *Astrophys. Space Sci.* **275**, 259–274 (2001).

112. “Local realistic theory for PDC experiments based on the Wigner formalism”, *Z. Naturforsch.* **56a**, 178–181 (2001). (Col. A. Casado & R. Risco-Delgado.)
113. “Radiative noise in circuits with inductance”, *Phys. Lett. A* **282**, 349–356 (2001). (Col. B. Blanco, H. M. França & R. C. Sponchiado.)
114. “Quantum ground state of stars consisting of noninteracting fermions”, *Class. Quantum Grav.* **19**, 417–427 (2002).
115. “Semiclassical optics as an alternative to nonlocality”, *Recent Res. Devel. Optics* **2**, 683–717 (2002), (Col T. W. Marshall.)
116. “Photon entanglement in the phase-space Q representation of quantum optics”, *Eur. Phys. J. D* **22**, 423–431 (2003).
117. “Quantum logic, probability and information: The relation with the Bell inequalities”, *Int. J. Phys.* **42**, 2545–2555 (2003).
118. “Entropy inequalities and Bell inequalities for two-qubit systems”. *Phys. Rev. A* **69**, 022305–1 to 6 (2004); **70**, 059901(E) (2004).
119. “Proposed optical test of Bell’s inequalities not resting upon the fair sampling assumption”, *Phys. Lett. A.* **327**, 33–37 (2004).
120. “The failure to perform a loophole-free test of Bell’s inequality supports local realism”, *Found. Phys.* **34**, 1643–1673 (2004).

BOOKS

1. *Energía de formación de huecos en la red cristalina del grafito (Formation Energy of Vacancies in Graphite Crystals)* (Universidad de Valladolid, Secretaria de Publicaciones, 1962).
2. *Einstein: su vida y su obra (Einstein: His Life and Work)* (Aula de Cultura Científica, Universidad de Cantabria, 1982).
3. *Problemas conceptuales de la Física Cuántica (Conceptual Problems of Quantum Mechanics)* (Universidad de Cantabria, 1983).

CHAPTERS OF BOOKS AND PROCEEDINGS

1. “Brownian Motion and the Stochastic Theory of Quantum Mechanics”, J. Biel and J. Rae, eds. (Plenum, 1973).
2. “Locality in Stochastic Electrodynamics”, in *Proceedings of the Einstein Centennial Symposium of Fundamental Physics* S.M. Moore, A.M. Rodríguez-Vargas, A. Rueda, and G. Violini, eds. (Universidad de los Andes, Bogota, 1981). pp. 213–225.
3. “Stochastic Differential Equations with Non-Markov Processes”, in *Stochastic Processes in Non-Equilibrium Systems*, L. Garrido, P. Seglar, and P.J. Shepherd, eds. (Springer-Verlag, 1978).

4. "Stochastic Electrodynamics and the Bell Inequalities", in *Open questions in Quantum Physics*, G. Tarozzi and A. van der Merwe, eds. (Reidel, 1985). pp. 283–296.
5. "Microscopic and Macroscopic Bell Theorem", in *Determinism in Physics*, E.I. Bitsakis and N. Tambakis, eds. (Gutenberg, Athens, 1985). pp. 351–364.
6. "On the Compatibility of Local Realism with Atomic Cascade Experiments", in *Open questions in Quantum Physics*, G. Tarozzi and A. van der Merwe, eds. (Reidel, 1985). pp. 87–101. (Col. T. W. Marshall & F. Selleri.)
7. "Classical Equilibrium between Radiation and Matter. New look at an old problem", in *Stochastic Processes Applied to Physics*, L. Pesquera and M. Rodriguez, eds. (World Scientific, Singapore, 1985). pp. 184–202.
8. "Stochastic Optics: A Classical Wave Theory of Light Giving Particle-like Properties", in *Proceedings of 2nd. International Symposium. Foundations of Quantum Mechanics*, (Tokyo, 1986). pp. 66–71. (Col. T. W. Marshall.)
9. "Towards a Stochastic Classical Theory of the Particle Behavior of Light", in *New techniques and ideas in quantum measurement theory*, D. M. Greenberger, ed. Annals of the New York Academy of Sciences, 480, 400–406 (1986). (Col. T.W. Marshall.)
10. "Can Quantum Mechanical Destruction of Physical Reality be Considered Complete?", in *Microphysical Reality and Quantum Formalism*, G. Tarozzi and A. van der Merwe, eds. (D. Reidel, 1988) pp. 325–337.
11. "Stochastic Optics: A Wave Theory of Light Fitting Recent Experiments", in *Problems in Quantum Physics: Gdańsk 87*, L. Kostro, A. Posiewnik, J. Pykacz, and M. Zukowski, eds. (World Scientific, 1988), pp. 294–316. (Col. T. W. Marshall.)
12. "The Search for Hidden Variables in Quantum Mechanics", in *Quantum Mechanics versus Local Realism—The Einstein, Podolsky and Rosen paradox*, F. Selleri, ed. (Plenum, 1988), pp. 365–390.
13. "Symmetric and Asymmetric Models for Atomic Cascade Experiments", in *Quantum Mechanics versus Local Realism—The Einstein, Podolsky and Rosen paradox*, F. Selleri, ed. (Plenum, 1988), pp. 447–456. (Col M. Ferrero & T. W. Marshall.)
14. "What is a Photon?" in *Dynamics of non-linear Optical Systems*, S.J. Bermejo and L. Pesquera, eds. (World Scientific, 1989). (Col. T. W. Marshall.)
15. "Stochastic Optics. A Wave Theory of Light Based on Classical Probabilities" in *The Concept of Probability*, E. Bitsakis, ed. (Athens, 1989), pp. 291–298. (Col. T. W. Marshall.)

16. “Zeropoint Radiation: Real or virtual?”, in *Problems in Quantum Physics, Gdańsk’89*, (World Scientific, 1990), pp. 131–154.
17. “Nuclear Fluid Dynamics with Collective Mass”, in *Mètodes semi-clàssics aplicats a la Física nuclear* (Institut d’Estudis Catalans, 1990). pp. 159–168. (Col. A. Mañanes.)
18. “Does Quantum Mechanics Predict Violations of the Bell Inequalities?”, in *Bell’s Theorem and the Foundations of Modern Physics*, A. van der Merwe, F. Selleri, and G. Tarozzi, eds. (World Scientific, 1992). pp. 412–421.
19. “Can the Stern-Gerlach Effect Exhibit Quantum Nonlocality?”, in *Symposium on the Foundations of Modern Physics 1993*, P. Busch, P. Lahti, and P. Mittelstaedt, eds. (World Scientific, 1993). pp. 361–368 (Col. T. W. Marshall.)
20. “The Wave-particle Duality and the Bohm-Aharonov Effect” in *Waves and Particles in Light and Matter*, A. van der Merwe and A. Garuccio, eds. (Plenum, 1994). pp. 29–36. (Col. M. Ferrero.)
21. “On the Nonlocal Predictions of Quantum Optics”, in *Third International Workshop on Squeezed States and Uncertainty Relations*, D. Han, Y. S. Kim, N. H. Rubin, Y. Shih and W. W. Zachary, eds. (NASA Conference Publication, 3270, 1994). pp. 581–590. (Col. T. W. Marshall & A. Vidiella-Barranco.)
22. “Proposed New Polarization Correlation Test of Local Realism”, in *Fundamental Problems in Quantum Theory: A Conference Held in Honor of Professor John A. Wheeler Annals of the New York Academy of Sciences*, Vol. 755, (1995) pp. 429–437.
