

THE FUNDAMENTAL UNIVERSE

-PROJECT ABSTRACT-

Theory of entire Universe –THE UNIFICATION
By Daniel Georgel Preda

HELICAL GEOMETRODYNAMICS... is much more than a theory, for the first time it became a reality. This project is in progress and includes **2 free downloadable books** (pdf. files). So...right now you can see **“LIVE”** the evolution of this...final theory.

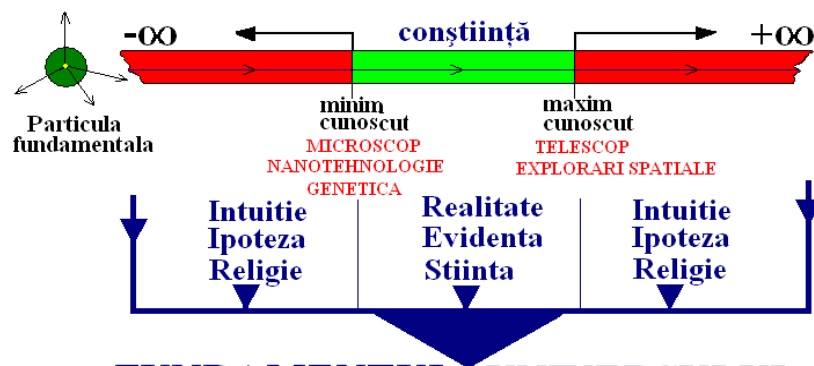

www.thefundamentaluniverse.ro

GOVERNMENT OF ROMANIA,
by Romanian Copyright Office, recorded in National Works Register the work “Universe Foundation” and “Fundamental Law of Creation”.

The project will modify the self-consciousness of readers who deeply understand it. This extended awareness will grow beyond microscope and telescope limits (minimum and maximum).

The intuition, the most powerful tool of human thinking, will be the engine which will change your understanding about creation of the entire Universe.

In this situation, all religions and science are put together. All goes to the same point!

The key of everything was decrypted, the single one which opens all locked doors, from everywhere, from ...anytime!

...its name is...

HELICAL GEOMETRODYNAMICS.

Exploring all religions, as an ancient source of life or Universe research, I found that all symbols, **no exception**, describe the fundamental geometry of everything. The same all science and ...crop circles...

The human behavior, what humanity made in the entire history, is based on an unique geometry, a helical one!...So as all mineral, animals, plants, galaxies...have the same helical geometry. This name is **E.F.T. (Fundamental Helix of Transport)**. Any fundamental particle, or cluster, has a helix path, in movement from A point to B point.

E.F.T. has 3 distinct zones, crossing **3 different densities** of gravity. These are **vortex IN**, **transport** and **vortex OUT**.

E.F.T. has some distinct characteristics:

- 1- **Peripheral connection**, forming long chains, or selfconnection, thoroidal shape.
- 2- **Axial attraction**, annexation of different E.F.T. in a bundle of helix.
- 3- It is **reversible** in opposite dynamics and **preserves** his geometry.

All these helical flows can build 3 distinct shapes:

- 1 - **Sphere**, stable structure.
- 2 - **Thorus**, intermediate structure.
- 3 - **Cylindric**, flow structure.

The matter is forced to flow in a condensed shape, in a tetrahedral geometry.

The superfluidity of Universe and the tetrahedral structure of fundamental particles describe, for the first time,absolutely everything.(example – feelings)

The helix is, in fact, a tetrahelix flow of fundamental particles.

The chirality of **everything** is on left hand or the right hand...because in the fundamental geometry of our Universe there are a lot of tetrahedrons **...flowing!**

All systems are open. All structures have a minimal one **IN/OUT** flow circuit.

Right now, twistor theory, bundle fiber,

superstring, M theory or **what theory you want...**are broken!

Much more... collect all these sort of theories and multiply them with any number you want...

This is the **POWER** of my theory, so that... my project logo is:

I have enough power to change history, are you ready?

In the first book **E.F.T.** is identified in all religions, human body, life and minerals.

We will go back in time, near 30 000 years ago, since caves period, and identify...the **E.F.T. geometry!**

Human culture, from any time and any place, has many symbols.(geometry is preserved) All reflect the E.F.T....including...ARTS!

The single culture which I know is keeping **alive** all ancient symbols, since 30 000 years ago, is the Romanian culture!

In Romania there are **many houses like a temple**. Many eat steel from this sort of plates.

All religions, from any time, have similar symbols, as snakes or tetrahedral structures.

Axial attraction(tree, chalice, yin/yang...) or **peripheral connection**

(ouroboros snake, crown...) are **DYNAMIC** structures and **tetrahedral** positions are **GEOMETRIC** structures.

All together are named **GEOMETRODYNAMICS**.

This perpetual transport, from A point to B point are the **same pattern**, the **E.F.T.** shape. The **TREE OF LIFE** is now real, it exists,

as axial attraction, in science and ...religions!

"The fundamental law of creation", the first book, does not analyze Universe in a scientific manner. It is only a pure observable phenomenon using **human intuition**.

The second book is about **E.F.T.** in a **scientific** and **symbolistic** way. For any system there are identified 3 sorts of interactions.(with another):
(Fundamental three-vector, simultan actions)

- 1-Attractor, flow vector-**Vc**
 - 2-Influence system, frontal vector, **Vf**
 - 3-Internal system, interior vector, **Vi**
- Vr** – vector resulting from these ones.

This helical shapes **always** introduce momentum and force linked by geometry.

Entire project is **counter projection thinking**.

Researchers study circle but it is not a reality, it does not exist.

PI does not exist, it is a black (a shadow) and unique solution but does not describe the colour and the shape of different realities.

Einstein once said that if he could understand pi then he could understand who God is.

The project is about all colours and forms.... behind PI.

Now it appears another short movement, a deviant one. That is **U.F.T.** and means **Fundamental Torsion Wave**.

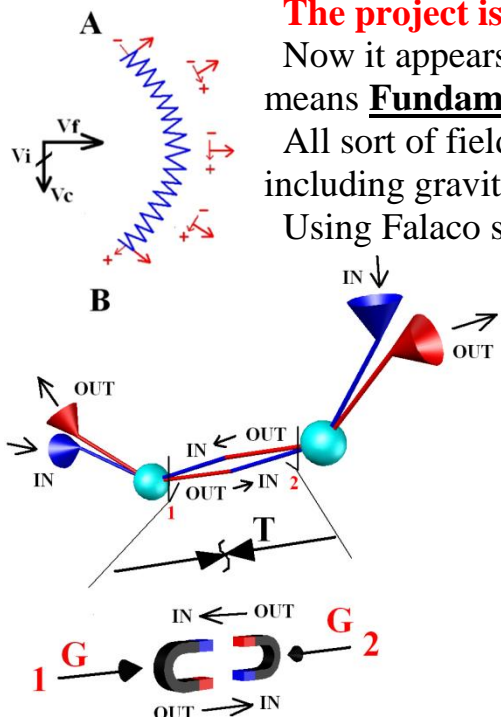

All sort of fields are decrypted, including gravity and electromagnetism.

Using Falaco solitons the real gravity shows that the unique sense is wrong... **double sense is right!**

DNA replication mechanism is decrypted.

All turbulent flows are decrypted too. Lorenz attractor the same...

Fluid mechanics talks about sphere, cylinder and thorus...the same entire nature...everything!

Superstring theory, M, aether theory or any final theory may became a thin and particular case of “THE FUNDAMENTAL UNIVERSE THEORY”

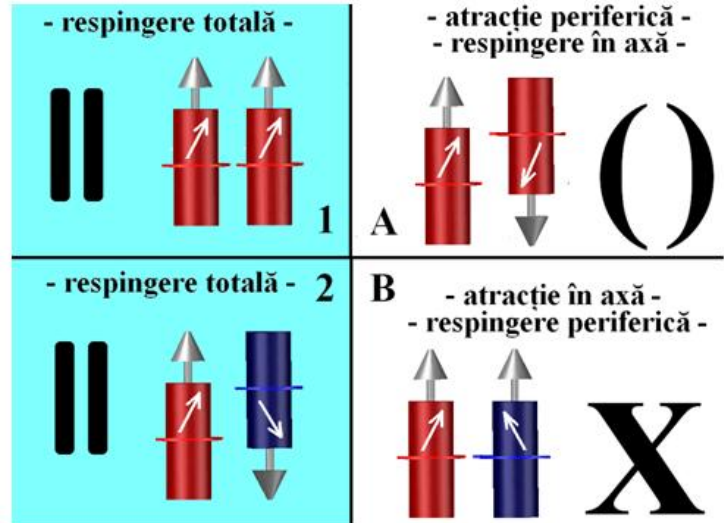

For a good understanding it was published a **FUNDAMENTAL CODE** of interactions between any 2 helical flows.

There are only 4 combinations between parallel/counter-parallel and chiral/couter-chiral flows.

Two of them have repulsive interactions between axis and ends.(1,2)

Another two are A and B case:

- 1) Attraction of ends and repulsion of axis (**peripheral connection**)
- 2) **Axial attraction** and repulsion of ends.

The incredible fact of this theory, is that it does not use any mathematics formula. That means everybody can understand it... **number of study years... doesn't count!** ...the simplest theory in the world become the powerful theory of our history...

The simplest experiments will shatter and collapse physics, all sciences and so religions!
With this words I inform you that earthquake just started from Romania...

You can watch it... LIFE!
